

The CYBHI mandates that Local Education Agencies have the requisite technology to meet operational standards. This includes the ability to securely collect, store, and transmit data, as well as having the billing infrastructure to submit claims and receive payments. Our CYBHI checklist will help you assess your LEA's readiness for CYBHI, and determine if you need an EHR like Exym to help you prepare. For more information visit www.exym.com.

CYBHI Technology Checklist

- Advanced integrated multi-payer billing and deep knowledge of Medi-Cal billing practices
- Medi-Cal eligibility checks
- Data is encrypted and security posture aligns with HIPAA and FERPA
- Automatically detect billing errors before claims submission to keep revenue management on track
- Robust data analytics and reporting capabilities for evaluating claims, program progress, and specific groups or demographics
- Customizable permissions access to documents and data by role (admin, psych, etc)
- Comprehensive record management, streamlined data entry, and customizable forms
- Ability to track and record health history, assessments & progress notes
- Affordable flat monthly fee regardless of billing volume
- Customizable notes templates and a clipboard of saved phrases for faster note-taking and documentation
- Intern supervision tools with automated alerts for notes and deadlines, and secure private messaging for edits and corrections.
